OVER HALF CENTURY OF SERVICE WHERE NEEDED THURSDAY, JULY 9, 1959

## Summer Is Here

Summer is now here, having arrived on the night of June 20th.

Until September 23rd, summer will be with us. By that time you will probably be ready for the cooler winds, the wet weather and the falling leaves, burning straw and leaves, school, football and all that goes with fall.

But right now, the vacation season is yours for enjoyment. The days will be long, the nights short and swimming, camping, hiking and outdoor sports will be at their peak. Take advantage of all the outdoor sports and find time to relax and refresh your spiritually and mentally.

But exercise careful planning and take things slowly. Too many vacationers are killed on the highways, in swimming and in boats. The number of these summer tragedies increases each year—more people buy boats and more people visit lakes, beaches, pools, etc.

So keep in mind these things, and protect the lives of those near to you by doing so. And then enjoy this summer. It will never return again—the summer of 1959—and maybe the year will have changed, or maybe we will not be at peace, or beloved ones may be gone, at some later date. Therefore, may good use of your time—not just summers alone—for every day that passes leaves you one day less.

## On Taking Poison

You may not realize it, but at least 600,000 children each year swallow some kind of poison. This should make every parent think twice and carry out a routine check of bathroom cabinets, kitchens, etc.

In practically every home there are some poisons, whether they be insecticides or medicines, and children, who are naturally curious, are likely to try some of them out—if they are within reach.

It is too late, of course, to worry about that after some child has drunk poison, and therefore this editorial is a warning, and could save your child's life.

## Growing Old

Growing old is something which sometimes is done gracefully and sometimes is not done gracefully. All of us hope that we will be able to perform this feat gracefully.

Of course, in the United States it is sometimes hard to be around for the process. With automobiles killing several thousand each month, with so many men working themselves up to a heart attack or stroke, and with other diseases taking their toll, it is sometimes difficult to make the grade.

Several who come to mind are Bernard Baruch, for example, who recently took off for a six-weeks' visit to England. Baruch is 88 years old, and is still hale and hearty, and seeing the world and offering advice. He has been advising U. S. presidents for many decades.

THE UPPER ROOM

THURSDAY, JULY 9

Read John 3:1-16

Our Father who art in heaven

(Matthew 6:9)

An elderly woman wished to

join the church. She had never

learned to read or write. As a

part of her training, the pastor

sought to have her learn the

Lord's Prayer. "It starts this

way," he said. "Our Father who

art in heaven."

"Does that mean that God is

my Father?" the woman asked.

"Yes," the minister said, "that's

what Jesus teaches us about God."

"Then, pastor," the woman re-

plied, with tears upon her cheeks,

"I don't need to learn anymore.

Since God is my Father, that's all

I need to know."

What a glorious blessing it is

to know and believe that God is

our loving Father. How wonder-

ful to know that every moment of

our lives He loves us and cares for

us! He seeks us when we go a-

stray, even as we are on our own

children.

We need not fear in moments

of doubt and discouragement. His

eternal presence is ever near to

give strength and faith. Never

can we say that we face life alone,

for God our Father is always with

us. He will strengthen us when

we open our hearts to Him.

## PRAYER

We thank Thee, our Father, for

the wonderful knowledge of Thy

eternal presence. Help us always

to know that Thou art not far from

us at any time. Help us to trust

in Thee through Jesus Christ Thy

Son, our Lord. Amen.

## THOUGHT FOR THE DAY

God our Father loves us and

will care for us every day of our

lives.

John Ambler (Michigan)

## Revivals And Repentance

(Anonymous)

Fifty years ago preaching was one of the most common sights in the Statesboro area. Sunday afternoon and revivals one each year at each church. Revivals were conducted during October pulling time and a time of year when dollars look as big as wagon wheels.

It was an accepted truth that the only kind of a preacher to arouse the dormant religious attitude of the people was a preacher of the old school, preaching hell fire and damnation and from "away off." Evangelists in those days were plentiful and came in all sizes, kinds and willingness to meet the devil on his own grounds with his holiest of holies.

These meetings were always largely attended at night, the old women making up the morning congregation. Everyone could sing, or thought they could, and when the old foot organ pealed forth its melodious notes, everyone in the congregation would join in.

One preacher was so widely appreciated that he was invited back for several years and did a great deal of good. He would always relate how he was converted from a drunkard, that an angel saw his soul, how considerable he was of sinners and well knew that he was in a bad way.

The services would begin quietly but each night the tempo would rise. The singing louder and the efforts of the preacher more extended. The first sermon would be along the line of brotherly love, baptism, being a brother's keeper and the like.

About Thursday night things would really get hot. Jesus would be reviled, the repentant Peter described, the apostle Paul clarified and the sins of mortal man such as drinking liquor, smoking and chewing tobacco, gambling and dancing laid across the fire pipe of damnation and consumed by their own evil ways.

There was one steward of this particular church, a good, honest man if one ever lived, who could resist everything save the temptation of drink once or twice a year and chewing tobacco. When he got thirsty he would go to the jug instead of the spigot. After he ate, Brown's, and Corvito Vilsa, he would go to the jug. His family, food, fishing and attending revivals in the summer time. All other things to him were mysteries hidden in the dark.

The "sins of the flesh" sermon always came on Saturday night, immediately followed by confession. As the old moving song "Just As I Am" would be sung, repentant ones would go to the altar, confess their sins and repent. The good brother would sit uneasily for a while, take out his plug of tobacco, look at it longingly, put it back in his pocket, take out again his room, for example, is up to 5.9 inches wider than comparable cars.

This occurrence took place so many times until the wife of the community made capital of it and the good brother was the center of all eyes at each revival thereafter.

Being a steward he had a voice in selecting the revivalist. One year he happened to meet up with one who used tobacco and was determined to have him conduct the revival that year. Believing the preacher to be the "leader of the flock" he was perfectly willing to do as the preacher did.

The only extravagance he engaged in was burial insurance, the only emotion his religion, the only opinion those most agreeable to his neighbors, for he was a peace loving man.

There was one thing he was determined to do and that was make a grand entrance into the king-

### URANIUM

Fourteen years ago when our country dropped bombs on Japan, we learned about a new metal, uranium, which is called one of the miracle metals. Up to that time, most people had never heard of uranium. I was one of the uninformed folks. Today it is as precious as gold.

Our own enlightenment I have been finding out about this metal and I shall pass the information on to you—in case you are interested.

Uranium is never found in its pure state, but is mixed with other metals, especially pitch-blende. Two-thirds of the uranium comes from the Belgian Congo in Africa. Great Britain takes our supply, comes mostly from the Colorado plateau and reaches down into New Mexico, Utah and Arizona.

Millions of years ago the plateau was the bed of vast inland seas. Geologists say that about 150 million years ago the land level rose because of pressure within the earth and the seas disappeared. In the shallow water and boggy swamps which were left, great diatoms lived and died. Today their fossils are being found in pitch-blende deposits along with the uranium.

The first boom in Colorado's Plateau was for gold, a hundred years ago; then in 1898, when the Curie discovered radium, the second boom began. Radon gas, which is a minute quantity in uranium, but at this time uranium was used in great quantities in the Belgian Congo, so Colorado mines were deserted. With the coming of World War II and research on the atomic bomb, uranium became the most sought after metal in the world.

This essay on uranium was brought to mind by a statement I heard a man make the other day. A new use has been found for the atomic bomb, and it is called a "Find out." It is read, "What this car is doing for men (and women) in all walks of life. Figure out in dollars and cents what it would mean to you to own an absolutely dependable little car. It seems that smart men in Colorado have comfortable places where, for a good fee, people who are afflicted with "rheumatism" can sit for hours with their feet buried in dirt from the uranium mines. It is supposed to have great curative properties for arthritis.

A gentleman from Bulloch County, who was traveling out west, brought back several bushels of the dirt, and he and his friends take daily "treatments." May be this dirt is a better place to "Find out."

The world does not need or want H-bombs. The disaster at Amdram is a sample of what horror a bomb could cause—multiplied by a million. How much better it is in a Chevy.

### A RETURN TO FEET

One theory held by some historians is that events move in cycles. If the current point in the cycle of history can be identified then we can know what has passed just what is to come.

From this impressive philosophy I've arrived at a conclusion. Walking is going to return to the scene as an interesting, natural pastime. As more and more people have more and more leisure time, they are sure to discover the new almost forgotten fact that legs were the chief method of locomotion before B. C. Invented the wheel.

The wheel very quickly became a substitute for human legs. The cart developed into the buggy. In the 19th century the buggy makers worked hard to sell their product as a pleasure vehicle. One advertisement said, "I will build you a buggy just as you want it, trim it like you want it trimmed, paint it any color you want, stripe it to suit you, give your correct proportion whether you want a light, medium or heavy buggy. My line of vehicles consists of all kinds and sizes, and I will build you just what you want. I have just a new buggy on thirty days free trial and guarantee it two years."

From here it was just a flick of the wheel to Ezzymann's Car, advertised in 1911 by the Brush Automobile Company of Detroit. This ad actually got into the act. "Find out," it read, "what this car is doing for men (and women) in all walks of life. Figure out in dollars and cents what it would mean to you to own an absolutely dependable little car. It seems that smart men in Colorado have comfortable places where, for a good fee, people who are afflicted with "rheumatism" can sit for hours with their feet buried in dirt from the uranium mines. It seems that smart men in Colorado have comfortable places where, for a good fee, people who are afflicted with "rheumatism" can sit for hours with their feet buried in dirt from the uranium mines. It is supposed to have great curative properties for arthritis.

A gentleman from Bulloch County, who was traveling out west, brought back several bushels of the dirt, and he and his friends take daily "treatments." May be this dirt is a better place to "Find out."

The world does not need or want H-bombs. The disaster at Amdram is a sample of what horror a bomb could cause—multiplied by a million. How much better it is in a Chevy.

## ONE THING AND ANOTHER

By George Watson

### A RETURN TO FEET

One theory held by some historians is that events move in cycles. If the current point in the cycle of history can be identified then we can know what has passed just what is to come.

From this impressive philosophy I've arrived at a conclusion. Walking is going to return to the scene as an interesting, natural pastime. As more and more people have more and more leisure time, they are sure to discover the new almost forgotten fact that legs were the chief method of locomotion before B. C. Invented the wheel.

The wheel very quickly became a substitute for human legs. The cart developed into the buggy. In the 19th century the buggy makers worked hard to sell their product as a pleasure vehicle. One advertisement said, "I will build you a buggy just as you want it, trim it like you want it trimmed, paint it any color you want, stripe it to suit you, give your correct proportion whether you want a light, medium or heavy buggy. My line of vehicles consists of all kinds and sizes, and I will build you just what you want. I have just a new buggy on thirty days free trial and guarantee it two years."

From here it was just

**OPEN HOUSE**  
Mrs. Glenn (Karen) Oefelein and little daughter, Lori Anne, were complimented by her grandmother, Mrs. Harry Clark and her mother, Mrs. Leslie Witter, on Wednesday afternoon at 3:14-B Jewel Drive, when they entertained at open house.

Mrs. DeWitt Thackston greeted the guests, assisting in serving and mingling with the guests were Mrs. Leonard Bond and Mrs. Charles Hollar.

The tea table was lovely overlaid with an embroidered cloth, over pink satin, with show-ers of pink satin ribbon at each corner. At one end of the table was the crystal punch bowl, presided over alternately by Miss Anne Lamb, Miss Sylvia Zetterow and Miss Jack Keith. The center piece was formed of pink and white asters and pink peonies, flanked by pink roses, carrying out the color motif of pink and white. An assortment of dainty sandwiches, individual cakes, and a variety of green and white and toasted nuts were in silver trays on the table. Karen was lovely wearing an aqua sheath with pink aster corsage, and Lori Anne in pale yellow organza, with pink aster corsage.

About fifty guests called between the hours of three and six o'clock.

**LOVELY PARTIES**  
The banquet room of Mrs. Bryant's Kitchen was the scene on Thursday morning at ten o'clock, of a breakfast honoring Miss Sarah Elizabeth Smith, a July bride-elect. Hostesses were Mrs. Grady Attaway, Mrs. Alfred Down, Mrs. George Bean, Mrs. Herbert Kinney, Mrs. Frieda Klotz, Mrs. Miller and Mrs. Dan Lester.

The long table was covered with a white linen cloth. Designating the seating of their honor guests were brass apothecary cases filled with fresh fruit, in which nestled a miniature bride and groom. At intervals down the table were wooden bowls of identical fruit and glistening greenery.

Mrs. Dull's Book on "Southern Cooking" was the gift to Betty from her hostesses. Knowing the book would tell her "what to do," based on actual experience, causing much laughter and conversation.

After the supper was served, bingo was played, with everyone present winning and prizes.

Those attending were, Mr. and Mrs. Logan Hagan, Mrs. E. L. M. Hill, Mr. and Mrs. James Ann Smith, Mrs. Fred Bland, Mrs. W. Jones, Mr. and Mrs. E. Price, Mr. and Mrs. W. T. Coleman, Mr. and Mrs. W. Cowart, Mr. and Mrs. J. F. Darley, Mr. and Mrs. Allen Lanier and Mr. and Mrs. R. P. Mikel.

**ELABORATE TEA**  
One of the loveliest pre-nuptial events for the Smith-Jennings wedding July 16, was highlighted by an elegantly appointed tea given Thursday afternoon at the home of Mrs. Ebert Andrew Smith, 302 North Main Street, with Mrs. Fred Harden Smith, Mr. Hubert Paul Jones, Mr. Albert Sydney Dodd and Mrs. Hubert Paul Jones, Jr., co-hostesses.

As you entered the lovely and spacious home of Mrs. Smith, you were greeted by Mrs. Charlie Olliff, Sr., and Mrs. J. B. Averitt. Mrs. Harry Smith and Mrs. Ernest Teel introduced to the receiving line, in which were, Mrs. Ebert Andrew Smith, Mrs. Horace Smith, the honoree, Miss Sarah Elizabeth Smith, Mrs. Harold E. Jones, Sr., and Mrs. Fred Harden Smith.

**MAN TAKES TO WASHINGTON**  
Reports From

THE STATE OF Georgia has much at stake in the hearings being held by the Civil Aeronautics Board on the question of establishing a new transcontinental airline route connecting the Southeast with the West Coast.

It is the last a viable route to coast-to-coast air travel not yet established, although the Southern Railway is serving transcontinental routes through various points of the Southeast and Western—American, Braniff, Capital, Continental, Eastern, National, Texas, and Western—are competing for franchises to serve all or part of it. Of the six airlines seeking the entire route, three American Delta and Eastern—have proposed routes either originating in or en route to the Southeast. The latter two already serve a number of Georgia cities, and in their cases, would stand to get connecting service across the country.

THE PRINCIPAL issue which the CAB must resolve is whether to divide the route among several of the competing airlines or to grant a single franchise to one carrier. An indirect consideration is whether the route will be designed to serve the passenger and freight needs of the entire Southeast or will cater almost exclusively to connect the vacation lands of Florida and California.

A delegation of 16 Georgia businessmen, headed by Frank K. Shaw, General Manager of the Atlanta Chamber of Commerce, and including himself, testified before the board this week to urge a decision granting one-carrier service between Atlanta and the coast.

Mr. and Mrs. C. C. DeLoach and other relatives here.

Rev. Inman Gerald will leave Monday to attend a summer session at Southeast Seminary at Wake Forest, S. C.

Mr. Lewis Jackson of Pembroke and Mrs. Eva Williams of Brookline visited Mrs. J. H. Ginn Sunday. Other guests Monday night were Mrs. Earl Ginn and children of Savannah.

Mr. and Mrs. Franklin Zetterower visited Mr. and Mrs. Henry DeLoach in Statesboro during the week.

Mr. and Mrs. Slater Toppins and little daughter of Marietta, Mrs. Janie Waters and Mr. and Mrs. Thomas DeLoach and children of Statesboro visited Mr. and Mrs. C. Zetterower Sunday.

The G. A. Girls of Harville Baptist Church, Misses Amelia Waters, DeLores Williams and Janie Williams and Shirley DeLoach will leave Monday for Camp Glen at Brunswick to be gone a week.

Mrs. Tom Mahon and children of Long Island, N. Y. are spending a few weeks with Mrs. D. W. Branch.

Mrs. G. R. Waters, Mrs. R. P. Miller, Mrs. Herman Lucas and Dorothy Chester attended the Lanier-Cobb Wedding Sunday afternoon.

Everyone in life has some kind of racket, it seems, whether they think so or not.

**Celebrate Anniversary Of School**

(By Mrs. Edna Hoel)

Fifty years ago a school was formed, made up of 21 boys and girls and one teacher. The school building had six rooms. Two of them were class rooms. There was one large assembly room, a room for a library, a workshop for the boys and a kitchen for simple instruction in cooking. It was mainly for the education of mountain children.

Today, there are 24 buildings in a gorgeous mountain setting of 200 acres. There are about 112 students from all over Georgia and 29 teachers. All of the children help with the daily routine of work. They are not in their school work and show evidence of ambition in order to enter the school.

The occasion of this gathering together of the Georgia Federation of Women's Clubs was to dedicate the new H. B. and C. R. Cannon school and administration building which was made possible by the bequest of Cecil E. Cannon, the Pessie Fenton Ottley Library that was built by the Young Matrons' Circle for the Tallulah Falls School, and the Nannie Woodward Westmoreland Hall and unfinished dormitory for girls. The Federation also held a Club Institute.

We arrived the day before and found everyone working on the preparations for the next day. Mr. J. H. Harris, director and superintendent of the school, and Mrs. Harris greeted us and told us they were giving the students, who had worked hard all day, a treat at the Dillard House in Dillard, Ga., and asked us to come also. We had a separate dining room, and all stood and sang the blessing before partaking of a most sumptuous and delicious meal. As our party had time, we roamed through the buildings at the school, that were to be dedicated the next day and found them to be most complete and beautiful for the purposes to be served. Anyone would be proud to go to a school of this kind.

We also went through the Will building which houses visiting dignitaries and contains the dining room and kitchen—all immaculately clean. From the front porch of this building is a lovely view of the Georgia Federation of Women's Clubs, the mountains in the background.

The next day at 4:00 p. m. Mrs. E. L. Barnes, president of the Georgia Federation of Women's Clubs, opened the dedication meet-

ing. Mrs. Henry W. Moore, past president, gave the invocation. Mrs. E. L. Barnes then introduced the guests and Dr. Claude Purcell, superintendent of the State Department of Education, gave greetings to the assembly. Dr. C. S. Hubbard, the first boarding school student at Tallulah Falls, had been working for \$125 a day and cleared the first night. It looked as though we were going to drop off a ledge, but the car always stayed upright and the steep drop wasn't noticeable.

That evening the Georgia Federation of Women's Clubs had a program on the theme, "A Golden Age—A Golden Future" and "Tallulah Falls School, My Home Town."

After Mrs. Ralph Butler, past president of Georgia Federation of Women's Clubs gave the invocation, a sextet from the Forsyth Junior Woman's Club sang beautifully "Bless This House." You'll Never Walk Alone," and "Let There Be Peace On Earth." They were accompanied by Mrs. John Hart cut. A. J. Smith, president of the Brunswick Junior Woman's Club, Mrs. W. V. Smithwick, past president of the Moultrie Federation of Women's Clubs, and Mrs. J. C. Smith, president of the Cedartown Woman's Club, all sang.

They each told of a child who went to Tallulah Falls School. Mrs. Goodwin told of one who came from a broken home. He was rather neglected and needed a hair cut. Mrs. Goodwin told him her husband and she would pay for half the haircut, but he had to earn the other half. He worked hard running errands, and one day, red-faced and breathless, he ran in to her shop, holding up his picture of the child. He had earned the money and said, "Made it."

His father wanted him and his two sisters to work but Mr. and Mrs. Goodwin induced the boy to go to Tallulah Falls School. He does very well there.

Everyone is now working to

**Soil-Water Conservation**

By E. T. ("Red") Mullis

John D. Lee, a cooperator of the Georgia River Soil Conservation District in the Georgia community, has a complete soil and water conservation plan for his farm. Mr. Lee plans a water disposal system consisting of parallel terraces and sodded waterways on his cropland. Pastures of coastal bromeliads and penstemon lalia grass are a part of his plans, along with drainage ditches and proper woodland management. He has already constructed a nice pond for livestock water, under the District program. I was out with Mr. E. T. NeSmith in the Westside community last week and rode over his new farm pond with him. He has a nice pond, almost entirely cleaned out of trees and stumps. He has done a good job of sloping his dam and spillway under adverse soil conditions.

As we went over Mr. NeSmith's pond together, I noticed a few spots of Malden cane coming in the shallow areas. When we come along side these water-weeds, or grass, in the boat, I leaned over and pulled them out with almost no effort, throwing them out on the hill.

The point I was trying to get across to Mr. NeSmith is the same I am trying to get across to many pond owners in the county now. It is so easy to prevent annoying waterweeds (or the type growing from the bottom of the pond and extending to, or above the top) from getting in your pond. I explained to Mr. NeSmith how pulling these weeds out before they had a chance to seed or scatter from roots was a simple matter, but if allowed to grow, they would give him trouble in the future. He agreed that this was the thing to do.

There are few pond owners who build a boys' dormitory to be known as the Ida Hester Fitzgerald Hall. Anyone donating \$50 or more will have his name on a plaque on the wall of the building. A picture of a woman holding aloft a candle and leading some children, depicting the "Light Upon the Mountain" was presented to the school by Mrs. Harris. Mrs. Barnes accepted it. May the "Light Upon the Mountain" Tallulah Falls School, grow ever brighter.

Those from Statesboro who attended the celebration were: Mrs. E. L. Barnes, president of the Georgia Federation of Women's Clubs, Mrs. Alfred Dorman, Mrs. J. E. Bowen, Jr., Mrs. L. M. Durden, Mrs. Edna L. Hoel, Mrs. Chen, E. Cone, Mrs. Kermit R. Carr and Mrs. A. W. Ellis.

**BULLOCH TIMES**

Thursday, July 9, 1959 Seven

If you haven't made any money in the last ten years, we suggest you either switch jobs or retire.

do not go over their pond enough to do what we did at Mr. NeSmith's. The old proverb, "An ounce of prevention is worth a pound of cure" applies double in pond management, as many have learned too late. Few pond owners I know have had the foresight to exercise that ounce of prevention. Pond weed trouble can be compared to cancer. It is easy to root out at first, but almost impossible after it has a foothold. And they both come on subtle and without warning. So don't wait until it's too late, and start in hollering for help; start doing something now to help yourself.

The girls in bathing suits look especially good about now.

**SMOOTH AS RIDING OVER A PENCIL LINE...**

**your ride on modern concrete with sawed joints**

Driving is 100% enjoyment on modern concrete. Superbly smooth and quiet. No thumps. This is continuous-laid pavement... with only tiny, sawed-in cushion spaces. You can't hear or feel them.

And laid flat, concrete stays flat. Only concrete can be built to such flatness. This is due to its very nature... to the way it can be placed and leveled to accurate engineering standards... not just pounded into shape.

You can expect highways of modern concrete to last 50 years and more. Initial cost is moderate. Upkeep costs will always stay low. That makes all this mighty good news for you as a taxpayer. You won't be buying the same highway over and over again.

Extra safety is built into concrete, too. Dependable skid resistance, high night visibility.

Put all these advantages together and it's easy to see why concrete is your best buy for the heavy-duty highways—like those on the Interstate System. Want to know more? Write for new booklet. It's yours for the asking.

## Tips for the Times In Agriculture

(By Ray Williams)

If you are having trouble with your Centipede grass it might well be that your difficulty stems from one or more of the following:

Fertilization is the most important single factor in the maintenance of Centipede turf. Here is a grass that does not appear to withstand excessive or promiscuous fertilization. Many instances have occurred where a home owner has seen his Centipede grass lawn decline or disappear under such a "love" of fertilizer as his "ever loving care" only to find that the uncare for vacant lot next door, the same grass was thriving.

It seems to be certain that plant composition and fertility adjustments are involved in this unusual plant behavior. I think we must realize that Centipede grass is considered to provide a low maintenance turf. It is preferred for a more active maintenance program or a more desirable performing grass. St. Augustine,

Zealya or Bermuda grasses should be selected.

For all practical purposes over-fertilization and watering Centipede turf takes the grass out of its natural habitat and places it in a strange and new environment which is not conducive for optimum growth. It is very much like taking a fish out of water.

I will wager that if you used fertilizer freely this spring on old established Centipede turf, you are having trouble with dead patches in your lawn or you will have these unsightly spots appearing by the time July has passed.

Low fertility maintenance does not mean total absence from the use of fertilizer. The natural fertility, as determined by a soil test, is the only answer as to the kind and amount of fertilizer to be used. However, I am sure that high inorganic nitrogen, such as a sulfate of ammonia, nitrate of soda and ammonium nitrate should never be used on Centipede turf. For best results, the greater portion of nitrogen should come from an organic source, such as cottonseed meal.

The use of limestone material should be avoided unless soil test indicates otherwise. Centipede grows best under moderate acid conditions.

Iron deficiency is often encountered on Centipede grass. The
